Kabrňáci

Tight Fit Sudoku (10 points)

Write a single number from 1 to 9 in each cell (two numbers in the cells with slashes) such that each number appears exactly once in every row, column, and bolded box. In the cells with slashes, the smaller number must sit on top of the larger number.

Kabrňáci

Extra Space Sudoku (21 points)

Write a single number from 1 to 9 in each white cell such that each number appears exactly once in every row, column, and bolded box. The puzzle resembles a 16x16 sudoku, but 7 cells in each row, column, and bolded box are shaded in grey and will not contain any numbers.

Kabrňáci

Sudo-Kurve (22 points)

Write a single number from 1 to 9 in each cell such that each number appears exactly once in every row and bolded box. Unlike a standard sudoku, the rows here sometimes bend along the indicated curves. Each row contains exactly 9 cells.

Kabrňáci

Isosudoku (26 points)

Write a single number from 1 to 9 in each cell such that each number appears exactly once in each row in any of the three possible directions for rows and in each bolded box. While some of the rows (specifically those going from the upper-left to the lower-right) will not contain all 9 digits, no digit repeats within these rows.

Kabrňáci

Outside sudoku (28 points)

Write a single number from 1 to 9 in each cell such that each number appears exactly once in every row, column, and bolded 3x3 box. No clues appear in the grid; instead, numbers appear around the edges of the puzzle. Any number given outside the grid indicates that that number must appear somewhere in the three closest cells in the row/column that the clue appears in.

Kabrňáci

Consecutive (23 points)

Write a single number from 1 to 9 in each cell such that each number appears exactly once in every row, column, and bolded 3x3 box. In each and every case where vertically or horizontally adjacent cells contain digits that differ by 1 (such as 4 and 5), a gray box is drawn on the edge between those cells.

Kabrňáci

Thermo-sudoku (21 points)

Write a single number from 1 to 9 in each cell such that each number appears exactly once in every row, column, and bolded 3x3 box. Bent thermometers appear in the grid. In all cases, the numbers appearing in the thermometer must be strictly increasing from the "bulb" of the thermometer to its end.

Kabrňáci

Arrow Sudoku (28 points)

Write a single number from 1 to 9 in each cell such that each number appears exactly once in every row, column, and bolded 3x3 box. Some arrows appear in the grid; the digits in the circled cells must equal the sum of all digits along the path that the arrow travels. Digits can repeat within a sum, but cannot otherwise repeat in a row/column/box as usual.

Kabrňáci

S, as in Sudoku (24 points)

Write a single number from 1 to 9 in each cell such that each number appears exactly once in every row, column, and bolded 3x3 box. In many of the cells, a letter is given as a clue; a number can only be placed in this cell if its English name contains that letter in its spelling. For example, an S cell could indicate a 6 or a 7 as SIX and SEVEN have an S in their spelling but no other numbers do. The English numbers ONE, TWO, THREE, FOUR, FIVE, SIX, SEVEN, EIGHT, and NINE will appear in this puzzle.

- 1 - ONE
- 2 - TWO
- 3 - THREE
- 4 - FOUR
- 5 - FIVE
- 6 - SIX
- 7 - SEVEN
- 8 - EIGHT
- 9 - NINE
